Money Supply is defined as "all Currency and demand Deposits owned by persons other than Commercial Banks and the Government."

# SOURCES OF MONEY SUPPLY

END OF YEAR 1953-1960; END OF JANUARY 1961-

Dept. of Economic Research.

Source: Central Bank of Ceylon.

This chart indicates the origin of money supply in Ceylon

- "Government Finance" - shows the claims of the Banking system on the Government net of the shift of rupee cash between the Government and the public
- "Credit to Public" - shows the claims of the Banking system on the private sector net of change in time and Savings deposits

The total money supply line is below the line limiting Government Finance in the months of January, March to July, and September 1964 and March and April 1965, because net external banking assets were negative in these months
